1. The present invention relates to a method of  
2. determining the position of a target object  
3. in a 3D space. The method comprises the steps of  
4. providing a set of sensors, each sensor being  
5. capable of measuring the distance to the target  
6. object. The sensors are arranged in a circular  
7. pattern around the target object. The method  
8. further comprises the step of determining the  
9. position of the target object based on the  
10. measurements obtained from the sensors.
